PROFESSIONAL SUMMARY

Data-focused professional with practical experience in data analysis, data cleaning, visualization, and interactive dashboard development. Skilled in Python, SQL, PostgreSQL, Excel, Power BI, and Streamlit, with a strong ability to work with structured datasets, uncover trends, and communicate insights through clear and effective visualizations. Interested in applying analytical skills to solve business problems and support informed decision-making.

EXPERIENCE

E26 Media Production Pvt Ltd

Mangalore, India

Data Analyst Intern

Mar. 2026 – May. 2026

- Collected, cleaned, and transformed structured and unstructured datasets using **Python, SQL, and Excel** to prepare data for analysis and reporting.
- Performed **exploratory data analysis** to identify trends, patterns, anomalies, and key performance indicators from real-world datasets.
- Developed interactive **Power BI dashboards and reports** to present business metrics and analytical findings in a clear and actionable format.
- Applied data visualization and analytical techniques to convert raw data into **meaningful business insights**, supporting data-driven decision-making.

TECHNICAL SKILLS

Languages & Databases: Python, SQL, PostgreSQL, SQLite

Data Analysis: Pandas, NumPy, Data Cleaning, EDA, Data Transformation, Statistical Analysis

Visualization & BI: Power BI, Excel, Streamlit, Plotly, Dashboard Development, KPI Reporting

Data Management: API Integration, Web Scraping, Data Extraction, Data Validation

Power BI: DAX, Power Query, Data Modeling, Interactive Dashboards

PROJECTS

Game Price Intelligence | 🐙 Github

Python, Steam API, Time-Series Forecasting

- Ingested Steam and CheapShark APIs to track real-time video game pricing and discount trends.
- Built interactive dashboards and predictive models to forecast price drops and market shifts.

Music Store Database Analytics | 🐙 Github

PostgreSQL, Relational Databases, Advanced SQL

- Analyzed music store sales, customer spending, and genre trends using joins, CTEs, and window functions.
- Extracted high-value customer segments and regional artist demand to guide promotional strategies.

Netflix Content SQL Analysis | 🐙 Github

PostgreSQL, pgAdmin, Data Exploration

- Conducted exploratory data analysis on global movie and TV show catalogs using relational queries.
- Mapped catalog growth, content ratings, and regional release trends to evaluate content distribution.

Diabetic Neuropathy & Health Risk Analysis | 🐙 Github

Power BI, DAX, Data Modeling

- Built interactive clinical dashboard analyzing patient cohorts, HbA1c levels, and health risks across 2,000+ records.
- Implemented dynamic 3D organ visuals using DAX routing to compare controlled vs chronic hyperglycemic states.

EDUCATION

Yenepoya Institute of Arts, Science, Commerce and Management

Mangalore, India

Bachelor of Computer Applications - Data Science and Big Data Analytics

Jun. 2023 – May 2026
